

MOLYDUVAL Cleaner EL Spray

Cleaning Spray for Electrical Contacts

A new electrical contact cleaner. Suitable to clean all contacts, to remove greasy contamination and for the cleaning from old residues, which often lead to electricity loss and disturbances. The product evaporates intermediately, almost residue-free.

The small amount of active substances staying preserves and prevents from oxidation of the cleaned contacts.

The electrical contact cleaner spray is filled up with flame resistant propellant (CO₂).

Properties

- * evaporates nearly residue-less
- * removes synthetic and silicone lubricants
- * removes dirt
- * replaces cleaners with chlorine, trichloroethylen, per-chloroethylen, or other cleaners with ozone depleting potential
- * removes oil and fat

Applications

- * for cleaning and removing of glue residues, even for stripes, films, and labels
- * for cleaning and degreasing
- * for cleaning glass and metall before sticking
- * for cleaning tools contaminated with perfluoroalkylated greases
- * for cleaning of electronic stuff, fuses, contacts, motors, printed circuit boards, gold fingers, connectors, micro-wave and telephone circuit, avionics, relays, switches
- * for cleaning of wet measurements
- * for cleaning of wet precision instruments

Technical Datas

Color		transparent
Basis		Aliphates
Density 20°C	kg/m ³	770
Propulsant		CO ₂
Ignition Temperature	°C	240

The content of this manual is based on our current knowledge and experience in the development and manufacture of lubricants. Because of the complexity of tribological systems, the effect of our products depends on many parameters, which we cannot assess and which influence we cannot evaluate. For this reason general statements about the function of our products are not possible. The information in this manual, therefore, contains non-binding guidelines, which should give the technical trained reader information on possible applications. The information in this manual does not include property assurances or warranties or guarantees to the properties or suitability of this product in a specific application. Prior to its use it is absolutely necessary to test this product in the application to ensure that the product and its use is safe, economical and fully suitable. It should proceed with due diligence.
