

MOLYDUVAL Cleaner F 1

Highly efficient electronics cleaner

An incombustible, residue-free evaporating and environmentally friendly, low-viscosity perfluoropolyether liquid, which is used as a cleaning and degreasing liquid as well as a solvent. Is miscible with perfluoropolyether-based lubricants, it dissolves and evaporates quickly leaving no residue, making it ideal for cleaning lubrication points contaminated with fluorinated greases and oils. Is also very good for the preliminary cleaning of lubrication points, when then perfluoropolyether lubricants are applied.

Properties

- * good cleaning properties
- * free of harmful components (acc to Gefahrstoffverordnung)
- * clear and transparent
- * very economic
- * odor less
- * extremely low or no Ozone depletion potential

Applications

- * for cleaning and removing of glue residues, even for stripes, films, and labels
- * for cleaning and degreasing
- * to the maintenance and lubrication of high-grade steel surfaces in Food Industry
- * for cleaning of electronic stuff, fuses, contacts, motors, printed circuit boards, gold fingers, connectors, micro-wave and telephone circuit, avionics, relays, switches
- * for diluting perfluoropolyethers

Technical Datas

Color		transparent
Basis		PFPE
Density 20°C	kg/m ³	1650
Viscosity 25°C	mm ² /s	0,45
Flash Point	°C	no
Boiling Point	°C	55
Pour point Base Fluid	°C	-115

The content of this manual is based on our current knowledge and experience in the development and manufacture of lubricants. Because of the complexity of tribological systems, the effect of our products depends on many parameters, which we cannot assess and which influence we cannot evaluate. For this reason general statements about the function of our products are not possible. The information in this manual, therefore, contains non-binding guidelines, which should give the technical trained reader information on possible applications. The information in this manual does not include property assurances or warranties or guarantees to the properties or suitability of this product in a specific application. Prior to its use it is absolutely necessary to test this product in the application to ensure that the product and its use is safe, economical and fully suitable. It should proceed with due diligence.
